An innovative Swiss quality product for professionals

High-performance universal machine

Lips Kombinator K60H

The Lips Kombinator K60H is a multi-talented machine for larger businesses, consisting of a robust 60-liter mixing machine combined with a high-performance drive for large stainless steel attachment devices. The Kombinator is space-saving and requires only an electrical connection.

The 60-liter planetary mixer

The stand of the planetary mixer is made of solid cast iron. The machine runs quietly, is easy to maintain, and does not require oil changes. The speed is controlled via an easy-to-use control panel. The mixer always stops in the same position, which makes it easier to access the mixing tools.

Accessories

- 60-liter stainless steel mixing bowl
- Stainless steel heay duty whisk (4 mm)
- Stainless steel dough hook
- Stainless steel beater
- Stainless steel and Teflon bowl scraper
- Drive unit AE 20-2 for large plug-in devices

Options

- Stainless steel whisk (2 mm)
- 30-liter stainless steel mixing bowl
- 30-liter stainless steel tools
- Trolley for 60 or 30 liter bowls
- Lift for 60-liter bowl
- Attachment devices type HU1020

sustainable product,
can be reconditioned

The high-performance drive

An arm is attached to the side of the Lips mixing machine, on which the independently operated universal machine is mounted. The electrical connection, including the emergency stop, is made via the mixing machine.

The high-performance universal machine from the HU1020 series is a modern machine with a wide range of applications, high throughput, safe operation, and excellent processing quality.

The heart of this system is the AE 20-2 drive unit mounted on the arm.

Properties

- Stainless steel housing with automatic quick-change coupling
- 2 drive speeds and pulse mode
- with additional control for the cutting attachment with switched pressure flap
- Easy, reliable handling
- clear button elements
- low maintenance and reliable

Various tasks can be performed using the appropriate optional attachment. Suitable for processing large quantities.

- compact stainless steel design
- wide range of applications
- wide range of accessories
- Guaranteed perfect workmanship

Typical optional attachment devices

Cutting discs and cylinders, strainer, and meat grinder are made of stainless steel. A wide range of sizes and cutting types is available.

With pouring funnel, for straining or cutting vegetables

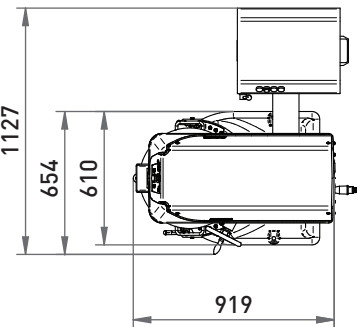

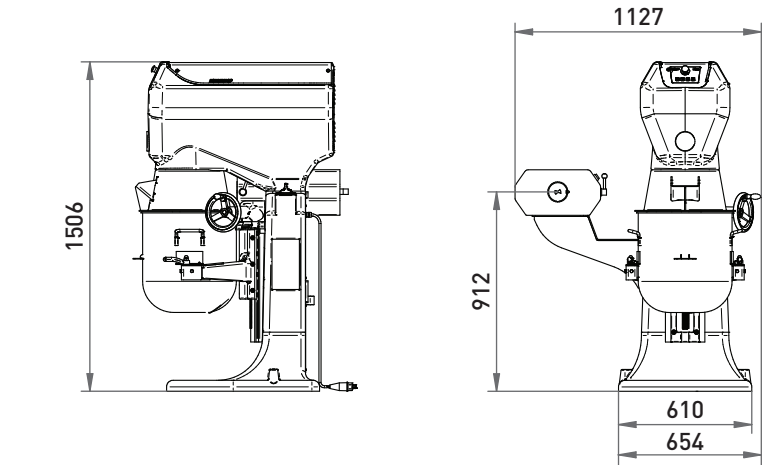

With vegetable cutting attachment

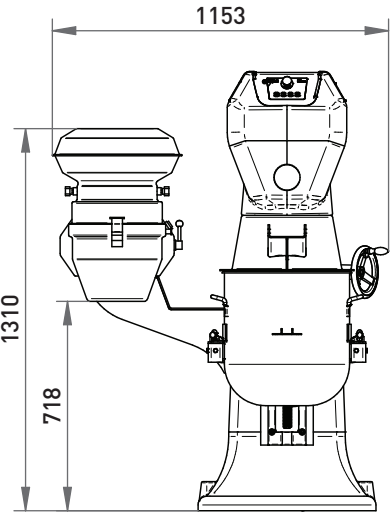

With meat grinder
