

A profitable way to spoil your customers

Twin agitator in stainless steel, cuts soft ingredients like ice cream

Agitator in polyethylene (PE), easy to clean, quiet, perfect for instant drinks

The elegant drink mixer Rotor Professional combined with your creativity will convince each and every one of your customers. At the bar, in hotels, restaurants and cafés, perfectly prepared and presented mixed drinks of all kinds – shakes, cocktails and instant drinks – are always a favourite. With a minimum of effort you can increase your turnover and return. The attractive colors and the design fit perfectly in every bar or service counter.

Variable speed

An important advantage of the Rotor Professional is its variable speed function. You can adjust the speed to individual needs, so different drinks can be mixed exactly right. The high turbulence stirring tool guarantees a fast and absolutely homogenous mixing of the ingredients, without spilling the product. It is even possible to add ice cubes to chill the drink – the ice remains whole, can be removed and won't water it down.

Function

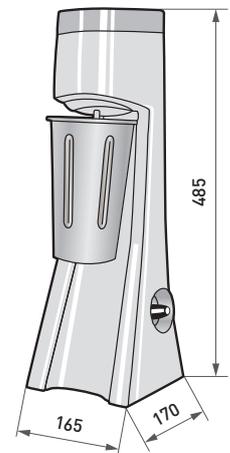

The operation is simple: when the container is clicked in, the motor starts automatically, remove the container and the motor turns off by itself. The speed can be manually adjusted during operation.

Further advantages

- high quality built to last through daily, professional use
- easy to clean thanks to the perfect construction and smooth surfaces
- rust-free metal housing, no plastic
- the motor is installed in rubber mounts
- low operation noise and vibration
- stable construction

Technical data

Model	Rotor Professional (RPR)
Article number	1115.00x
Power supply	230 V–240 V/50–60 Hz
Power output	100 W continuous operation/~300 W peak
Speed range	9000 up to 18000 rpm
